

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### GLIMPSES OF CHAFING DISHES IN THE PAST

THERE seems to exist in the minds of many the wholly to be contradicted notion that the chafing dish is a utensil of modern invention. Although its origin is enveloped in darkness, "looking backward o'er the ages" many allusions are made to its use.

Imagine, if you can, the Israelites, those dwellers in tents, feasting upon the locusts of Egypt and Palestine cooked in a utensil corresponding in many particulars to the chafing dish of the present day.

Among the ruins of Pompeii have been found bronze chafing dishes of unique designs and careful workmanship, which give undisputed proof of their use in this city, which contained the villas of many wealthy Romans. What a rich store of knowledge concerning Roman home life has been gained from these excavations!

## Chafing Dish Possibilities

Mommsen, in his "Römische Geschichte," refers to the lavish display at the tables of the Romans, and affirms that expense was never considered in their hospitality. In those days, he asserts, "A well-wrought bronze cooking machine came to cost more than an estate." What a trifling difference between these and our modern chafing dishes!

The history of France, that land to which we ever look for gastronomic delights, furnishes many an illustration of the high esteem in which chafing dishes have been held by many of the mightiest of their land.

Louis XV., according to Goncourt, took much delight in cooking, and often amused himself "by making quintessential stews in silver pans." The palate of Louis XVI. was often tickled by "piping hot dishes, brought in on a chafing dish."

Napoleon Bonaparte, when laying down the affairs of war and enjoying for a short period the joys of home life, has cooked,—as Baron Meneval writes,—in a silver chafing dish, an omelet for the enjoyment of the empress and himself.

Madame Récamier, the beautiful and intellectual society leader, whose salon was always filled with a brilliant circle, entertained by the

## Chafing Dishes in the Past

use of a chafing dish ; and many an historic speech has been made during the preparation of some viand fit for the gods.

Madame de Staël, "the greatest woman in literary history," when exiled by Napoleon Bonaparte from her beloved France, took with her, among household treasures, the chafing dish which played a not unimportant part in her Paris entertainments.

Glancing at the lives of some of England's greatest literary men, it is found that a faithful history of the London clubs to which they belonged, reveals the history of their manners and their ways. From the time that Sir Walter Raleigh founded the "Mermaid" to the days of the famous "Literary Club," chafing dishes have appeared more or less conspicuously on the tables of those giants of old, where —

"Mingled with the friendly bowl,  
The feast of reason and the flow of soul."

"I regard the discovery of a new dish as a far more interesting event than the discovery of a star ; for we have always stars enough, but we can never have too many dishes." If there are still those of this same opinion, with a chafing dish for a companion, cannot they work their way to fame ?

### CHAFING DISH SUGGESTIONS

THE chafing dish of to-day has accomplished much as a civilizer, seeming to rekindle the flames of hospitality and to elevate the standard of cookery. Who can doubt its permanent stay!

The bachelor feels himself proud to be called the pioneer in the use of this utensil. All must agree that epicureanism belongs to the lords of creation, and many an one has made himself quite famous by compounding some dish for "those palates who must have inventions to delight the taste."

The broader and more valuable use of the chafing dish has asserted itself, and now it is found in the well-conducted home, where its appearance at the breakfast table means the cooking of eggs to perfection; at the lunch table, the savory *rechauffé*. The chafing dish should not find a place on the table when a ceremonial dinner is served; but in the household where but one maid is kept, the Thursday night meal is often anticipated on account of

## Chafing Dish Possibilities

its use. When the eye of the convalescent brightens and his appetite is stimulated by a choice tidbit prepared on the chafing dish, then its value is most appreciated, and it is considered among the indispensables. All in all, the chafing dish is most happily in evidence when congenial spirits meet to make glad after "the lamps are lit," and "small cheer and great welcome make a merry feast."

So many and varied are the styles of chafing dishes, one must be governed by his taste and the extent of his purse strings in making a selection. Comparatively few can enjoy the luxury of a silver or silver-plated dish, so the choice lies between agate ware, nickel-plated, copper, or brass ones. The last two kinds mentioned are not recommended, as much time needs be expended to keep them brightly polished. If a moderate-priced dish is desired, preference is shown for the nickel-plated. Nickel-plated dishes are very attractive and may be easily kept clean and bright by washing in hot, soapy water, wiping dry with a soft towel, and rubbing with a piece of chamois skin or cotton flannel.

The lower pan of the late chafing dish (known as the hot-water pan or bath) is supplied with two handles, which prove of great advantage

## Chafing Dish Suggestions

in moving the pan when heated. An accident from burning, in the household of a manufacturer, suggested this valuable addition of handles, and also the addition of a tray on which to place this pan.

The upper pan, familiarly called the blazer, is furnished with a long wooden handle, and is more often used alone than with the hot-water pan. The hot-water pan, however, plays a necessary part, when the dish to be prepared contains eggs, or eggs and milk in combination, which should always be cooked at a low temperature. It is also of use to keep the viand hot, without further cooking, that a second serve may be as satisfactory as the first. The flame of the lamp should always be extinguished, as soon as the cooking is accomplished.

A circular chafing dish is supplied with one lamp, the wick of which is asbestos, covered with a fine wire netting. The flame is regulated by metal slides, which are controlled by an adjustable screw. The average lamp holds about one gill of alcohol, and will burn about one and one-half hours. Oval chafing dishes, which are not commonly used, are supplied with two or three lamps, the wicks of which are cotton lamp-wicking. The flame is regulated by turning the wicks by means of an adjustable screw.

## Chafing Dish Possibilities

The best grade of alcohol, known as high proof spirits, is recommended for chafing dish use. It gives more heat, burns without an odor, and proves less expensive than an inferior quality. It is taken for granted that alcohol is to furnish the fuel, for the days of live coals and oil have passed away, and the days of gas and electricity are not yet at hand for those of moderate means.

With a chafing dish outfit, an ambition naturally arises to collect pretty bowls and odd pitchers of various sizes, dainty jars and covered dishes to hold seasonings and condiments, and other unique choice pieces of china that may prove useful.

The glass or granite ware measuring cups, divided into thirds and quarters, are absolutely necessary, as are tea and table spoons for measuring. Let it be remembered that level measurements are called for in the recipes contained in the following chapters of this little book. It must never be forgotten that accurate measurements are essential for good results. "Trifles make perfection, but perfection is no trifle."

As chafing dish cookery should be done as noiselessly as possible, a long-handled wooden spoon proves a desirable utensil during the prep-

## Chafing Dish Suggestions

aration of the dish; while the large spoon with ebony handle may be reserved for the serving.

The chafing dish should be placed on a metal tray, previous to the filling of the lamp, thus avoiding all danger of accident after lighting, should a draft of air or the expansion of the heated fuel cause the flame to spread outward and downward. This tray also serves as a protection for the table, and admits of an easy removal of the dish when desired.

He who most carefully anticipates the pleasure of his family or guests has much preparatory work done. As far as possible the ingredients should be measured and mixed before the assembly of the party, and it is well if they be placed on the table or tray by the hands of the one who is to do the cooking, that "he may laugh as the play goes on."

Accept as a final suggestion the plan of measuring butter by tablespoons and making into balls by the use of butter hands. These balls will keep in good shape if allowed to remain in a cold place until needed.

#### TOAST, GRIDDLE CAKES, AND FRITTERS

##### Milk Toast

MELT two tablespoons butter, add two and one-half tablespoons flour, and, when well mixed, pour on gradually two cups milk. Season with one-half teaspoon salt, and stir constantly until mixture thickens. Have at hand six slices of toasted bread. Dip slices separately in sauce, when soft remove to serving plate, and pour over each slice one tablespoon sauce.

##### Tomato Cream Toast

Melt two tablespoons butter, add two tablespoons flour, mixed with one-half teaspoon salt, and pour on gradually one and one-half cups stewed and strained tomatoes, to which has been added one-fourth teaspoon soda; then add one-half cup cream. ## Chafing Dish Possibilities

### Egg Toast

Melt one tablespoon butter, add one tablespoon flour mixed with one-half teaspoon salt and one-eighth teaspoon pepper, and pour on gradually one cup milk. Pour over four slices of toasted bread, and sprinkle the top with the yolks of three hard-boiled eggs forced through a potato ricer or strainer.

### Anchovy Toast

Toast four slices of bread from which the crusts have been removed and spread with anchovy paste. Scald one cup milk, add two egg yolks, and stir constantly until the mixture thickens. Beat the whites of two eggs until stiff, add to the thickened milk, beat thoroughly and pour over the toast.

### German Toast

Beat two eggs slightly, add one-third teaspoon salt, one and one-half tablespoons sugar and two-thirds cup milk; strain. Soak four slices stale bread in mixture until soft. Heat and brown delicately on both sides in a hot blazer, using enough butter to prevent burning.

## Toast, Griddle Cakes, and Fritters

### Brewis

Break stale pieces of brown bread in small pieces. Butter a hot chafing dish, put in bread, and add milk to cover. Cook until mixture is smooth, which may be accomplished by mashing pieces with a fork during the cooking; season with butter and salt.

### Entire Wheat Griddle Cakes

Mix and sift one-half cup flour, one-fourth cup coarse entire wheat or Graham flour, one and one-half teaspoons baking powder, one and one-half tablespoons sugar, and one-fourth teaspoon salt. Add one-half cup milk, one egg slightly beaten, and one-half tablespoon melted butter. Drop from the tip of a spoon on a hot, well-buttered blazer. Cook on one side until delicately browned; turn and cook on the other side.

### French Fritters

Mix and sift one cup flour, one-fourth teaspoon salt, and two teaspoons baking powder. Add three-fourths cup milk, one egg well beaten, and one tablespoon melted butter. Fry same as griddle cakes. When cooked, spread with currant jelly, roll, and sprinkle with powdered sugar. Beat jelly with a fork, before attempting to spread.

they come and go. Every pleasure is transitory. We  
can't even eat long*

## IV

### EGGS

#### Poached Eggs

Have blazer two-thirds full of boiling water. Break each egg separately into a saucer, and slip into the pan. Cover and place blazer over hot water pan. Let stand until whites of eggs are firm. Remove from pan to circular pieces of buttered toast. Sprinkle with salt and pepper, and place on top of each one-fourth teaspoon butter.

#### Eggs à la Finoise

Prepare Poached Eggs and serve with tomato sauce.
